

Core Technology Solutions

Asset Recycling & Recovery Services

IT'S NO LONGER NICE. IT'S THE LAW.

Electronic waste is this generation's problem to solve. Disposal is no longer as close as the nearest waste basket. Local and federal law now govern how electronics can be properly disposed of. Electronics contain everything from mercury through lead and gold. Raw minerals must be refined and reused. Allow CTS to properly handle your electronic waste. We document and use only certified recycler's that give your enterprise assurances that everything was handled correctly.

EWASTE DISPOSAL

TRASH REMOVAL

ELECTRONIC RECYCLING

Our process allows us to aggregate, inventory control and de-manufacture your electronic waste. This process passes along key benefits to your overall initiative. Things like mechanical destruction, LEED certification, reconditioning and data destruction can all occur within your recycling and trash disposal services.

WE PREVENT.

- ✗ Improper disposal of electronic waste
- ✗ Security breaches within the release of electronics systems
- ✗ Deficient recycling practices
- ✗ Forgotten last-steps to rollout and installation programs
- ✗ "Half-Baked" plans resulting in costly revisits.

WE ENSURE.

- ✓ Safe, secure and documented results by R2 certified facilities
- ✓ Proper handling of electronics inclusive of inventory and data destruction
- ✓ Documented results with both certificates of destruction & recycling
- ✓ Seamless transition between delivery and disposal

Capability

Onsite acquisition of electronics
Offsite disposal of componentry
Electronic data collection
Aggregation of electronics
Breakdown of componentry
Inventory of SN's or MAC Addresses
Shredding and/or de-manufacturing
Certification of destruction
Certification of recycling
Asset inventory reporting & audit
